Land Remediation at Britannia Road, Huddersfield, HD3 4QB

Eco Control Solutions carried out remediation on Britannia Road in line with the phase 2 site investigation reference YEX1601. All materials within the proposed garden areas were stripped and removed to at least a depth of at least 50cm.

Eco Control Solutions then remediated the Japanese Knotweed on site which led to the majority of the site being excavated to a depth of 2-3m

No other contaminants were found during these works.

No materials are due to be imported onto site until development works commence.

The works were carried out between 01/03/21 and 15/04/21, please see below a selection of pictures:
