<p>I think this build would uplift the area as the plan for only two houses on this side would leave plenty of space for a woodland and a chance for wildlife with bat boxes and wild flowers for insects and pollinators with seating for walkers and the general public bringing nature back to the area. Anything would look better than what it does now as it looks as if the residents over the years has been dumping garden waste for a number of years. It would bring work for local tradesmen I can't understand why it hasn't been already built on as there are houses opposite this site. I've read the local statements about a footpath through but there is no footpaths on any old maps. I believe that the developers are willing to give two acres or 44% back to the locals and Parish something unheard of nowadays. This would make a beautiful space for people to sit or explore in a tranquil setting to reflect, rest and meditate. This would be great for the mental health. As I can see the top part of the site will be different to the bottom with two categories one with two houses and the other with the natural habitat</p>
