<p>This area is designated urban green space and this must be upheld. This is the same argument as in the last application and it remains. The impact on the landscape and the visual amenity since the devastation of the trees and the meadow in 2020 has been great.</p> <p>The field grasses and wild plants begin to grow and are then clearly sprayed with weedkiller. This is in direct contrast to the concept of promoting biodiversity! The precious biodiversity of the original site has not been restored since the previous application and neither have the boundary walls. In fact it continues to be destroyed and this is in direct conflict with the current application.</p> <p>It is clear that the land owner does not have respect nor regard for the value of the biodiversity and history of this site. Not for the visual amenity we have already lost due to his previous actions.</p>
