<p>There is already a severe lack of parking and regular traffic on the narrow Burn Road since the new Harron homes were built, this development will only make this worse. There is insufficient parking for the expected residents of the site let alone any visitors which will make parking for pre existing residents near impossible. Moreover, the roads around the area have not been repaired following the harron development and will get worse as a result of this development. There is local wildlife such as deer etc living nearby who will be impacted as a result of this. Moreover, the road access from Burn Road onto the main Halifax Road is visually restricted hence, increasing the number of residents in this area will inevitably lead to a collision if the road access is not resolved. The site for this development is not suitable given the surrounding area. There are also flooding issues in the area that should be considered beforehand.</p>
