

Whitehall Service Station Car Wash

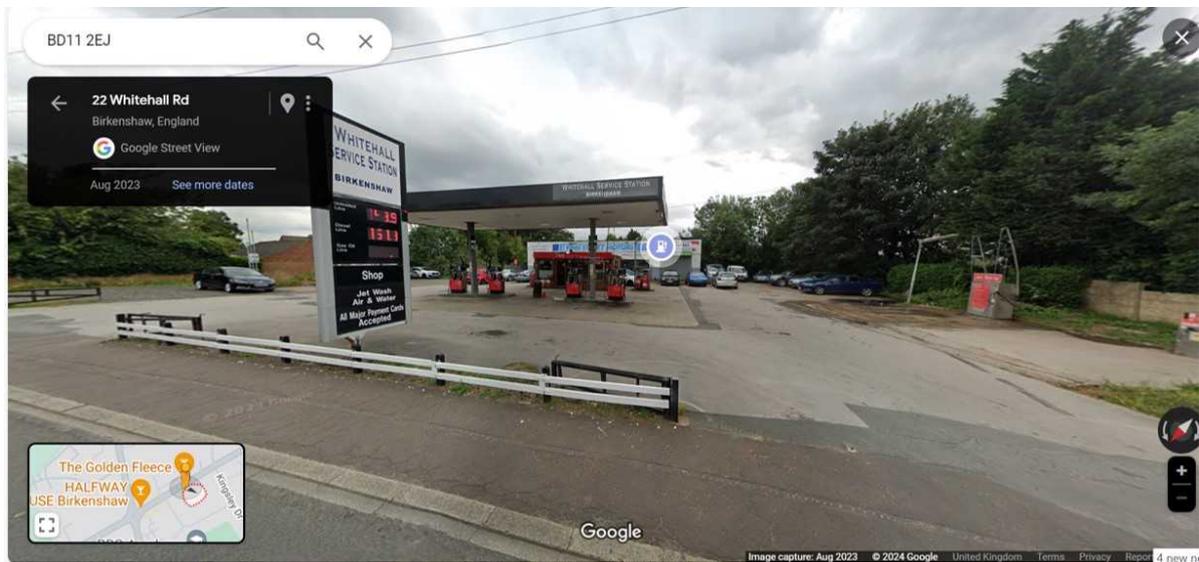

Whitehall Road East, Birkenshaw, Bradford, BD11 2EJ

Supporting Document

January 2024

Introduction

This application is for a hand car wash at Whitehall Service Station to replace the current coin operated self service jet wash facility.

Highways

The site is a service station therefore currently already operates a one way system for entry and exit. There will be no changes to these arrangements as the car wash area will be accessible on exiting the service station.

Proposed hand car wash area

Noise

There is currently already an operational jet wash facility at the site.

Drainage

Drainage is present to accommodate two washing bays which is demonstrated on the pictures below. Drains are well placed to capture any surface water. The car wash will not provide an engine bay wash service therefore there is no risk of oil residue on site.

Opening Hours

The hand car wash will be operational:

Monday-Saturday 10am to 6pm

Sunday 11am to 5pm

Conclusion

The proposal is to replace the self service jet wash for a hand car wash facility. There will be two washing bays and 2 drying bays. There will be minimal impact to the surrounding area as there is currently already a jet wash facility at the site, this is merely being changed to a manned facility.
