<p>The proposal and the plans submitted do not align. The wash bays and drying bays that would be next to each other, clearly would not flow. Going from one to another will cause issues with those using the petrol pumps. Cars already Q to get in the station without adding this in.</p> <p>The road is already busy, and this will only make this worse. There is poor drainage, the road is always soaked when the manual washer is used never mind what will happen with a hand wash, especially in winter.</p> <p>It's not in keeping with the local area and many other hand car washes attract trouble</p>
