Subject: Dangerous Tree at Storthes Hall Park

There is a dangerous tree at Storthes Hall Park just inside the entrance to Shelley FC Astroturf at HD8 0WA.

The huge tree has started to lean and to come out of the ground causing kerbstones to crack and lift. It also sways slightly in the recent strong winds. If the tree falls it will be extremely dangerous and will probably take a lamppost down which is situated next to it as well as lift the access road.

A tree contractor has advised us to contact Kirklees to give 5 days notice of work to make the tree safe which is the purpose of this email.

Photographic evidence is attached to this email.

Please confirm we can tell the tree to make it safe.

Regards

Rob Hardy
Officer, Shelley FC
