

Acorn Houses Respite Care

We are planning to use the property to open a respite home for adults with learning disabilities, autism and other vulnerabilities. We have done extensive research and know that there is demand for this in Kirklees. We will open our bookings predominantly to Kirklees Shared lives carers, and vulnerable adults living in the area. We aim to leave a room available for Emergency care if needed.

We will care for six adults at any one time, with two staff in house 24/7.
