<p>11 Balmoral Avenue, HD45LR Objection to planning application 2024/90357</p> <p>Lifting the conditions 15 and 33 on previous permission 2013/90793 will have a tremendous negative impact on the area affected by this project. First of all, the visual effect will be impacted. The landscape will be affected and the little trees that are on the area will have to be cut in favor of fonic and air pollution. The air quality will be affected as the quarry is getting closer and closer to the residential area. All the residents living close to the affected area will feel the negative impact this project will have upon their day to day life- noise pollution, air quality- lots of dust and landscape disturbances. Most of the families living in the area are elderly people or families with young kids that don't want to have a quarry in their back yard. The previous planning application was granted with conditions and now the company is trying to get them removed despite the National Planning Policy. The privacy and the quality of day to day life of all the residents that will have to have a quarry in their back yard will be affected as well. Beaumont Park area and Crossland Moor area is a beautiful green area that doesn't need more dust, noise and visual nuisance to it. This project will not bring anything positive to the area, quite the contrary, it will drive people away and it will affect the environment, landscape and people who live here. Kirklees Council officers and local elected representatives need to protect their community and the people who got them elected and they need to say a big NO to this horrible act of infringement on public's day to day life. Thank you</p>
