

CLIMATE CHANGE STATEMENT

location	44 Town Gate, Highburton, Huddersfield, HD8 0QP.
application	Alterations and Extensions to unlisted Dwelling within Conservation Area at 44 Towngate, Highburton Huddersfield, HD8 0QP.
client/applicant	Mr J Walker & Miss J Rutherford
job number	22/824
date	February 2024

ARCHITECTURE | PLANNING | DESIGN

Malkin Farm
Brow Lane

Company Registration Number: 09898149 - Company Registered in England and Wales

Part 1: Applicant details

Name of applicant/agent	Agent – Paul Matthews Architectural Applicant – Mr J Walker & Miss J Rutherford
Site Address	44 Towngate, Highburton, Huddersfield, HD8 0QP.
Description of Development	Alterations and Extensions to unlisted Dwelling within Conservation Area at 44 Towngate, Highburton Huddersfield, HD8 0QP.

Part 2: Climate Change Mitigation measures

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:
Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)
The works are subject to a Building Regulations application where compliance will be required. The property is dilapidated and very energy inefficient. The proposals include various aspects to enhance the thermal efficiency of the property in an energy efficient way
Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)
Contractors and materials will be sourced locally, wherever possible.
Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)
Materials to be used on the project (natural stone, timber, tiles & blue slate) are wholly recyclable
Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5)

Refer to the plans re proposals; • Air source heat pump • External insulated render • Low water consumption appliances • Low energy lighting • New insulated cavity walls encompassing North & East facing walls
Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)
Flood risk does not apply to this application
Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)
New sanitaryware appliances will have restricted flow rates.
Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)
A Woodstone built-in Swift bird box can be incorporated within the development below eaves level NB restricted height availability as this property is a bungalow. Give the location of the sycamore tree we consider the East elevation being the most suitable but are happy for the KMC Ecologist to confirm.
Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)
An EVCP is integrated into the proposals, on/within the existing garage. The provision of external insulated render and air source heat pump all go a long way to a reduction in the carbon footprint of the property.

Appendix B – Further information

Kirklees Local Plan

The development plan for the Kirklees Council area (www.kirklees.gov.uk/localplan)

Planning applications guidance and advice notes
