<p>The proposal to have a roof terrace is very imposing on the quiet hamlet and not in keeping with the area.</p> <p>The side of the terrace will be directly overlooking all of our garden and patio area which previously has been quite private. This is worsened further by the proposal for a glass balcony.</p> <p>The height of the terrace will also mean that anyone using it will be looking directly down into gardens and houses, particularly on cocking steps lane affording no privacy to residents who use their front gardens and other rooms including bedrooms at the front of their properties.</p> <p>The open element of the roof terrace is also likely to amplify noise levels in what is usually a very quiet hamlet, and as the property is in a valley, those noise levels may be quite disturbing, particularly if there is a crowd or on an evening .</p>
