<p>Is this application for air source or ground source? The agents application form says ground source. The owner of number 11 has recently completed major excavation works on his land opposite and in the course of this work has destroyed ancient land drains running at 90 degrees to the road. These have not been replaced and now properties below are suffering significant water ingress and the troughs are dry. We would not want to think further excavations to connect to number 11 are to be made and create further water damage to the properties below Townend Farm.</p>
