I would like to appeal against the above planning application for the following reasons. The application details a storage building, but we believe it will be used as an extension to his ongoing business, where trailers and farm machinery are currently been made and repaired. In this instance this application lies within the green belt area (ppg2). Where there is a general presumption against inappropriate development, as such the principle of erecting this building and the requirement to access it, I would consider it harmful to the green belt. Due to the site and scale of the building it would be detrimental to the openness and visual amenity of the green belt. In addition to the high risk already associated with vehicles currently entering and leaving the site, the noise pollution from a storage/workshop which we believe will be an extension to his existing business unit will not only disturb the peace for ourselves and adjacent residents. But will also disturb the local diverse wildlife habitat. Allowing such a venture would set a precedent to potentially allow future developers to ruin what is a beautiful green belt area in Kirklees. Previous building applications have been rejected on this site, due to the green belt, considered on its own merit the content of those previous rejections are relevant today and further add to our strong objections to the proposed application.
