<p>I support this application. The work described will will to replace a dilapidated kitchen/conservatory, which is not in keeping to the original building. I understand that the conservatory is not very energy efficient in its current state and the new build will offer a new efficient energy saving building. In this current climate where governments are offering grants for retrofitting the applicant is making the efforts to carry out these works themselves which should be supported. I believe the applicant has taken into account the conservation area and proposed aesthetic changes more consistent with the area as part of the application. The overall visual impact of the structure is minimal as it can't be seen from the front aspect and offers an improvement to the overall building structure.</p>
