<p>I live next door to the proposed planning application and feel it would be better for both parties if there is a wider space between my property (valcraft house) and the new industrial unit. It is currently only 300mm between the buildings at the front. This small space means there is no room to access either property for maintenance purposes. I also feel the new building should be kept in line with my home. On the plans shown there is no obstruction blocking light from my property and I would like this to remain the same . If the above applies, I will not hold any objection to these plans.</p>
