This oversized already built development is already having an adverse affect on the residential aminity of neighbours,and we do not support any further works or admendments.Poor material planning considerations both in design and appearance which has had a serious impact on others need to be considered in this planning application..There is not just over shadowing causing loss of light into ones property,it is blocking light into the surrounding area.. This style of building has an inappropriate layout and has a serious infringement on the privacy of local residents which has not been taken into consideration. This development and the way it has been built and the poor consideration for other residents needs to be taken into consideration as the extention is now over looking other residents homes due to its poor planning and layout ,which has now caused an infringement of privacy.This development is now providing direct views into other neighbouring properties ,which has ,as a result lead to a great amount of privacy lost to residents. The large window at the side of the property and one of the doors needs to be removed to respect ones privacy in ones home.The side window is overlooking an entire home taking away ones privacy.The whole entire drive and garden can be seen and the resident has no privacy left at all.The resident can be seen coming in and out of her home and this should not be allowed as that is a serious infringement to ones privacy which has been completely been taken away.WINDOW NEEDS REMOVING. further more having 2 doors at the side of the property is again removing privacy to ones property AND ONE OF THESE DOORS NEEDS REMOVING. The over sized rear window which is over looking into other residents properties needs to be made smaller as on original plan and the over sized kitchen window needs to be made smaller as not to be over looking into other residents properties. we do not support this application in anyway and the council needs to take all this information into consideration when making there decision.
