Do you wish your comments to be published on the website anonymously?	Yes
Planning issues in design/appearance and layout and objections against the planning permission. This development is overly intrusive making one feel cramped as it overlooks over and across into other residents properties, which is an intrusion to one's privacy.. There are concerns regarding the infringement of privacy for other residents which cause a great amount of interference to one's life. Residents' rights have been removed since this extension has been built and it's unacceptable. It is a huge privacy infringement which should not be ignored. Residents have a right to privacy in their own homes which has now due to this large development now been withdrawn from residents. There are some serious planning issues which the council need to look at here on this planning permission application. Reason is that it affects others in the surrounding area with its appearance and layout and the council need to consider the impact this development has already had on others when making their decision. This major development is affecting others in the area due to its design and poor materials planning. This is having such an impact on the privacy of others as it encroaches onto other properties. This infringement and invading one's privacy is over looking views from windows and living spaces of neighbouring properties both inside and outside the house should not be permitted as it is a serious infringement by law to remove this from another resident who has had the privacy removed completely. 1. The side extension which has a serious impact for a resident containing a high up large window should not be allowed as it's overwhelming and overlooking one's entire home and the resident has had all privacy totally removed and the council should not allow this, as it will have in the long run a serious impact on the resident having a high up window overlooking their property and this is removing one's entire privacy. 2. Having 2 doors at the side of the extension on the wall is not acceptable and one door needs to be removed as this adds to removing one's privacy. Also properties do not have 3 doors and the planning of this development has not considered other residents upon doing this poor built extension.	

5.

This rear extension again is invading one space and privacy as the oversized poorly built extension is extended into the middle of the rear garden overlooking into other residents properties removing ones privacy.

The large bedroom window at the rear is half way out in the garden overlooking onto other residents windows and garden and invading in privacy also needs removing and made smaller as the window is oversized .

It has taken away ones privacy due to how it has been built ..

The kitchen window is extremely huge for a kitchen window and needs to be smaller like other kitchen windows as it over looks into other properties and should not be allowed .

There is a infringement of ones privacy for residents with this poorly developed extension.

The planning team need to take into consideration the impact this development is having on residents .This whole entire development and materials planning has not taken others in the surrounding area into consideration when building this huge extension.

Family are objecting to any developments and want the council to take these comments into consideration as the extension should not be allowed to be left as it is,as it is impacting on the life of others and the council need to do something about it.Moving forward this application is not supported
