Reasons for objections for the above application.

This intrusive development makes us all feel restricted and cramped ,as it overlooks across into other residents properties.

There are concerns regarding an infringement of privacy for other residents.

This infringement will cause a great amount of interference to one's life.

Residents rights have been removed with regards to privacy infringement law,and residents living here all there lives or long term have a right to privacy in there own homes which has now due to this large development been taken away from residents and withdrawn like other residents do not matter .

There are serious planning issues which needs to be looked at here on this planning application,as it affects others in the surrounding area with it's appearance and layout and the council need to seriously consider the impact this development already has on others when making there decision.

This major development is affecting others in the area due to it's design and poor materials planning and now having an impact on the privacy of others as it encroaches onto other properties.

This infringement and invading ones privacy is over looking views from windows and living spaces of neighbouring properties both inside and outside the house should not be permitted.

The side extension which has a serious impact for a long term resident from having an oversized window high up should not be permitted as it overlooks ones entire home and the resident has had all the privacy totally removed,and the council should not allow this as it will have a serious impact on the resident having a high up window overlooking there property removing one's entire privacy.

Also having 2 doors on the side wall is not acceptable and one door should be removed.

Properties do not have 3 doors and the planning of this property has not considered other residents upon doing this poor built extension.

Having 2 doors at the side is invading ones privacy and one of the doors shouldn't be there .

The rear extension again is also invading one's privacy as this oversized poorly built extension is extended into the middle of the rear garden which is now over looking into other residents properties, removing ones privacy as the large bedroom window is over looking into other residents properties removing ones privacy due to how it has been situated and built and the rear bedroom window needs to be made smaller .

The very big kitchen window needs to be smaller like a kitchen window should be ,as it over looks properties at this huge size and shouldn't be allowed.

There is an infringement of ones privacy as it stands now .

The council need to take on board these points and understand the impact this development is having on residents.This whole entire development and materials planning has not taken consideration others in the surrounding area when planning and building this extension.

We are objecting to this planning application due to the above and we object to any new developments .

The council need to take these comments into consideration as the extension should not be allowed to be left as it is due to it impacting on others and the council need to do something about this.moving forward we do not support this .
