Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	No
We have not been notified of this mast until recieving a letter today so why dos it say we have been,on the application.I object on the grounds of how does it affect your health living near these obstrositys. The height obstructing our view and blocking the sun out of our front garden at some point everyday.Also I work in the same line of business as CU Phosco, they are supplying the mast and mysteriously it is planned to go in there yard, so the location is either a coincidence, or a conflict of interest, I believe if CU Phosco was based somewhere else on Westgate then the mast would be erected there, there must be an area near that is more suitable
