<p>The planned site is wholly unsuitable for the proposed development. It is an area of outstanding beauty, and is in a close-knit community, which will not benefit from the increased traffic, increased population and no increased infrastructure. The local schools and doctors surgeries are currently at high capacity and could not cope with more people to service. The entrance to the site is already a danger zone but increasing the traffic in this area proposes an increased risk to local pedestrians and other roads users. The local wildlife will be massively impacted as well. Train and bus services to the village are limited further impacting the extra volume of traffic around the village. I strongly object to this proposed development.</p>
