<p>As a resident of Stocksmoor, I am writing to express my strong opposition to the proposed development of 50 houses in our village.</p> <p>Having lived here for many years, I've witnessed first hand the charm and character that make Stocksmoor such a special place to call home. Unfortunately, the proposed development threatens to undermine these qualities by introducing numerous challenges that our community is ill-prepared to handle.</p> <p>One of the most pressing concerns is the safety of our village. The current access routes simply cannot accommodate the increased traffic that would result from 50 additional households. This poses a serious risk to pedestrians, cyclists, and motorists alike, and I fear for the safety of our residents, especially children and the elderly.</p> <p>Moreover, our existing infrastructure is already stretched thin, and the addition of so many new residents would only aggregate the strain. From schools and healthcare facilities to public services and utilities, it is clear that Stocksmoor lacks the capacity to support such rapid growth.</p> <p>Beyond these practical considerations, I am deeply troubled by the potential impact of this development on our local environment. The land earmarked for construction is home to a diverse array of wildlife, including many species that are already under threat. Destroying their habitats in the name of progress would be a grave injustice and could have devastating consequences for our ecosystem.</p> <p>In light of these concerns, I urge you to reconsider the proposed development. Our village is a precious and fragile ecosystem in its own right, and it is our responsibility to protect it for future generations.</p>
