<p>I am concerned about the site in question and its ability to support the proposed 50 new dwellings, as a visitor the village I dread driving on station road due to how the road becomes so narrow its single track in places travelling towards Shepley or if using Fulstone road to access New Mill. The idea of an additional 50+ cars needing access to this location worries me as there is no way that current roads can cope with additional traffic without adverse effects or accidents occurring. The field also has beautiful views across the valley and if the proposed properies are built this will affect views and light into the adjacent properties, especially the bungalows.</p> <p>I however love coming to stocksmoor due to it being an area of such beauty and regularly see a range of wildlife in the proposed fields, I have been lucky enough to witness birds of prey and badgers in the close proximity, all of which would be negatively affected by the building process and the proposed dwellings.</p> <p>In addition I am aware that the local doctors and schools do struggle to accommodate residents already and 50 dwellings will likely need these facilities and cause further issue in an already oversubscribed service</p>
