I strongly object to this proposed development. The narrow country roads around Stocksmoor cannot handle more traffic, particularly the road to Shepley, which is the main route to the closest shop, GP surgery, motorway network and some of the schools. The entrance to the site is proposed on an already dangerous bend and the cross roads nearby has already seen one fatality and many other accidents. The site is too close to the woodland and beck, which has an abundance of wildlife that would be hugely affected by this development. The field was until recently greenbelt and it is important to the quality of life of many residents of Stocksmoor who use the area for walking. The development would have a huge negative impact on the views, light and pollution in the village. Such a large development is completely unsuitable for such a small peaceful village that has no amenities.
