<p>I object to this application and agree with all aforementioned concerns regarding location , access and strain on local services.</p> <p>In particular I am concerned that most of the roads leading to this village are narrow,unlit and without pavements and will not safely support up to 200 new car journeys per day(calculated by 50 houses with 2 cars making outward and return journeys daily).</p> <p>Surface water and flooding. It is a concern that as the area is built over,then rainwater which would slowly absorb into the fields will now be concentrated as either “run off” into Shepley dyke in larger quantities more speedily or into the drainage system along with the domestic sewage from 50 houses. The drainage system from this small valley is not capable of further capacity as was proved when a smaller development on Cross lane was halted for such reasons.</p> <p>I object to this application.</p>
