I strongly object to this planning application. How can a single track road with access to 50 houses on a both way blind bend even be considered? Even if the new residents drive the long way round to Shepley (they won't), how can they get their children into a school where Shepley residents have to go on a waiting list as there aren't enough places. Will they walk their children up to Thurstonland school? On roads without pavements or street lighting, will they drive their children to Kirkbuton or Shelley and add to the already dangerous parking at school times? The public transport links are sporadic, you cannot guarantee getting to your place of work everyday using either the bus or the train. Shepley road is not gritted and when the roads freeze the single track road is covered with black ice from top to bottom. The whole application is preposterous and anything other than declining it will put people's lives in danger.
