<p>The proposed development will have a extensive impact on the rural landscape in the area and beyond impacting on the biodiversity of the adjacent woodland.</p> <p>The development of 50 houses will put additional pressure on the village roads from the increase in car users. A number of roads from Stocksmoor are single track roads, have no footpaths and have poor road markings and signage (Stocksmoor cross roads especially). As a rural village the increase in traffic will be a higher risk to cyclists, walkers and horse riders who regularly come through the village.</p> <p>The additional 50 new homes will also impact on the schools places available in the area including Shepley, Thurstonland and Farnley Tyres. This will mean parents will have to drive children to these schools or further afield as the public transport service (buses and trains) from Stocksmoor are inadequate.</p> <p>There are no amenities in the village other than one pub and the village hall which has an impact already on the traffic in the village without the addition of 50 new homes.</p>
