The location already has limited access and this is going to cause disruption in addition to the works already approved. There is also concern about the overlooking of existing properties and privacy. Will the building erected have windows overlooking the properties and gardens of others? The area is a conservation area and is not being treated as such, it is being built up with properties which are not in proportion with the surroundings and consideration of others. The existing garage is needed as parking space for the new property owners and inline with new build developments should be required to have a parking space instead of converting this into office/entertaining rooms. The existing residents are already struggling to park their cars and the land should be conserved for this purpose.
