## **Car Park Management Plan: Holmfirth Tech, Huddersfield Road, Holmfirth, HD9 3AR**

- 1) In terms of the proposed methods of control of use of the car park, signs at the car park entrance and within the car park are erected (and will remain in place and be replaced as necessary) state that the car park is private and for the use of users of the Holmfirth Tech only (see photo at Appendix A).
- 2) The Tech has a contract with Flash Park and there are numerous signs within the car park as shown in Appendix A, stating that the car park is a controlled parking area on private property and that parking charges will be levied (£100) for unauthorised users. In this regard, regular surveys of car registration plates take place and matching these with legitimate Tech users, to ensure unauthorised parking is reduced and eliminated wherever possible.
- 3) The marking out of the car park will be carried out in accordance with the proposed layout plan ref: (23227) 10 and will be maintained thereafter. The number and location of accessibility spaces is identified on this plan, together with the location and number of cycle parking spaces.
- 4) In terms of the dissemination of information for centre users on sustainable travel options and locations of town centre public car parks, information will be provided in literature & posters within the Tech (on information boards / walls etc) together with content on the Tech's website, detailing available bus routes and timetables, and other available town centre car parks.
- 5) A mechanism for review of the Car park Management Plan will be in the form of an annual review by the Tech's Board of Trustees.
