Contaminated Land

Further to our previous comments dated 23rd October 2024, we have received a Phase 1 Report authored by Roberts Environmental Ltd, dated April 2023 (ref: 230318.R.001). The report includes geotechnical information, which is outside the remit of Environmental Health. Therefore, this consultation response only relates to the land contamination aspects of the report.

The report assesses the site setting and former uses. A walkover survey was conducted to inform the risk assessment in April 2023, during which visual and olfactory evidence of potential contamination was observed, including numerous tanks including staining of the ground and chemicals containers left from the former chemical works. The preliminary conceptual site model developed identifies several potential pollutant linkages. Based on these findings, the report concludes that the environmental risk associated with the site's ground conditions is medium. Therefore, a site investigation is recommended to further assess potential risks prior to redevelopment.

We accept the report and recommend a revision to the contaminated land conditions we previously proposed on 23rd October 2024.

Recommended Conditions
CLC2 Submission of a Phase 2 Intrusive Site Investigation Report - Condition

Groundworks (other than those required for a site investigation report) shall not commence until a Phase II Intrusive Site Investigation Report by a suitably competent person has been submitted to and approved in writing by the Local Planning Authority.

Reason: To ensure the safe occupation of the site in accordance with Policy LP53 of the Kirklees Local Plan and paragraph nos. 189 and 190 of the National Planning Policy Framework

CLC3 Submission of Remediation Strategy - Condition

Where site remediation is recommended in the Phase II Intrusive Site Investigation Report approved pursuant to condition (CLC2) further groundworks shall not commence until a Remediation Strategy by a suitably competent person has been submitted to and approved in writing by the Local Planning Authority. The Remediation Strategy shall include a timetable for the implementation and completion of the approved remediation measures.

Reason: To ensure the safe occupation of the site in accordance with Policy LP53 of the Kirklees Local Plan and paragraph nos. 189 and 190 of the National Planning Policy Framework

CLC4 Implementation of the Remediation Strategy - Condition

Remediation of the site shall be carried out and completed in accordance with the Remediation Strategy approved pursuant to condition (CLC3). In the event that remediation is unable to proceed in accordance with the approved Remediation Strategy or contamination not previously considered in either the Preliminary Risk Assessment or the Phase II Intrusive Site Investigation Report is identified or encountered on site, all groundworks in the affected area (except for site investigation works) shall cease immediately and the Local Planning Authority shall be notified in writing within 2 working days. Works shall not recommence until proposed revisions to the Remediation Strategy have been submitted to and approved in writing by the Local Planning Authority. Remediation of the site shall thereafter be carried out in accordance with the approved revised Remediation Strategy.

Reason: To ensure the safe occupation of the site in accordance with Policy LP53 of the Kirklees Local Plan and paragraph nos. 189 and 190 of the National Planning Policy Framework

CLC5 Submission of Verification Report - Condition

Following completion of any measures identified in the approved Remediation Strategy or any approved revised Remediation Strategy a Verification Report by a suitably competent person shall be submitted to the Local Planning Authority. No part of the site shall be brought into use until such time as the remediation measures have been completed for (that part of) the site in accordance with the approved Remediation Strategy or the approved revised Remediation Strategy and a Verification Report in respect of those remediation measures has been approved in writing by the Local Planning Authority.

Reason: To ensure the safe occupation of the site in accordance with Policy LP53 of the Kirklees Local Plan and paragraph nos. 189 and 190 of the National Planning Policy Framework

CLC7 Contaminated land - Footnote

All contamination reports shall be prepared by a suitably competent person, as defined in Annex 2 of the National Planning Policy Framework. Reports must be prepared in accordance with the following guidance:

- *Land Contamination Risk Management (LCRM)*
- BS 10175:2011+ A2:2017 *Investigation of Potentially Contaminated Sites. Code of Practice*
- *Development on Land Affected by Contamination - Technical Guidance for Developers, Landowners & Consultants - (v11.2) June 2020* by the Yorkshire and Lincolnshire Pollution Advisory Group.

The conditions relate to Planning Control only. Approval under the Building Regulations may also be required, and the applicant should contact their Building Control Provider for further information. Any other necessary consent must be obtained from the appropriate authority. If the applicant commences work without discharging conditions, they will be at risk of enforcement action and invalidating the permission if the planning condition is a pre commencement condition.

NC8 Noise Report required for proposed noise generating use close to existing noise sensitive premises - Condition

Before construction work commences a noise assessment report by a suitably competent person shall be submitted to and approved in writing by the Local Planning Authority. The report shall include:

- a) an assessment of all noise emissions from the proposed development
- b) details of existing background and predicted future noise levels at the boundary of noise sensitive premises.
- c) a written scheme of how the occupants of the above-mentioned noise sensitive premises will be protected from noise from the proposed development including details of all necessary noise attenuation. The development shall not be brought into use until all works comprised within the measures specified in the approved report have been carried out in full and such measures shall be thereafter retained.

Reason: To ensure the proposed development does not cause harmful noise pollution within neighbouring noise sensitive locations, in the interest of amenity, to comply with the aims and objectives of Policies LP24 and LP52 of the Kirklees Local Plan and Chapters 12 and 15 of the National Planning Policy Framework.

NF4 Competent Person - Footnote

All noise assessments should be carried out by a competent person. The applicant may wish to contact the Association of Noise Consultants <http://www.association-of-noiseconsultants.co.uk/> (020 8253 4518) or the Institute of Acoustics <http://www.ioa.org.uk> (0300 999 9675) for a list of members.

CSC1 Construction Site Working Times - Condition

No construction related noise shall be audible beyond the site boundary outside the hours of:

- 07.30 to 18.30 hours Mondays to Fridays
- 08.00 to 13.00 hours Saturdays

With no construction related noise audible beyond the site boundary on Sundays or Bank/Public Holidays.

Reason: To safeguard the amenities of the occupiers of nearby properties in accordance with part 15 of the NPPF and LP52 of the Local Plan

CSF1 Construction Sites working times – Footnote

Kirklees Council has powers under Section 60 of the Control of Pollution Act 1974 to control noise from construction sites and may serve a notice imposing requirements on the way in which construction works are to be carried out. It has additional powers under Sections 80 of the Environmental Protection Act 1990 to prevent statutory nuisance including noise, dust, smoke and artificial light and must serve an abatement notice when it is satisfied that a statutory nuisance exists or is likely to occur or recur. Failure to comply with a notice served using the above-mentioned legislation

LC1 External Artificial Lighting – Condition

Before the installation of external artificial lighting commences a lighting scheme shall be submitted to and approved in writing by the Local Planning Authority. The scheme should include the following information:

- a) The proposed hours of operation of the lighting
- b) The location of all the luminaires
- c) The proposed design level of maintained average horizontal illuminance for the areas that needs to be illuminated.
- d) The measures that will be taken to minimise or eliminate glare and stray light arising from the use of the lighting that is caused beyond the boundary of the site

e) The methods of switching and controlling the lighting so that it is only operated at the permitted times and at times when it is required. No external artificial lighting shall be used unless the lighting has been installed and operated in accordance with the approved scheme.

Reason: To safeguard the amenities of the occupiers of nearby properties and promote sustainable development in accordance with part 2 and 15 of the NPPF and LP52 of the Local Plan. LF1 Artificial lighting - Footnote The proposed design levels of illuminance should be shown to be appropriate for the intended use by reference to appropriate guidance. Generally, to minimise problems of glare and stray light from external artificial lighting it should be installed and maintained in accordance with the “Guidance Note 01/21 for the Reduction of Obtrusive Light” by the Institution of Lighting Professionals: 2021 www.theilp.org.uk. The predicted levels of stray light must not exceed the recommended maximum levels given in Table 2 of this guidance for the corresponding Environmental Zone (i.e. E0 to E4).

LF1 Artificial lighting - Footnote

The proposed design levels of illuminance should be shown to be appropriate for the intended use by reference to appropriate guidance. Generally, to minimise problems of glare and stray light from external artificial lighting it should be installed and maintained in accordance with the “Guidance Notes for the Reduction of Obtrusive Light” by the Institution of Lighting Professionals: 2011 www.theilp.org.uk. The predicted levels of stray light must not exceed the recommended maximum levels given in Table 2 of this guidance for an Environmental Zone E3.

LC3a Illuminated Advertisements - Condition

The illuminated advertisement hereby permitted shall:

- be installed and maintained thereafter in accordance with the approved plans
- not be illuminated during times of daylight (dawn to dusk)
- shall not be illuminated between the times of 23.00hrs to 06:00hrs
- have a luminance not exceeding 300 cd/m² at any part of the illuminated area.
- have light sources that are not be directly visible from any usual viewing angle, in particular by drivers of vehicles on highways or pedestrians or from nearby premises.
- have illumination that is not flashing, intermittent or changing
- have an image that changes no more frequently than once every 5 seconds
- have the illumination turned off if any of the above requirements are not being met.

Reason: To safeguard the amenities of the occupiers of nearby properties and promote sustainable development in accordance with Policy PLP52 of the Kirklees Local Plan (as modified) and Chapters 2 and 15 of the NPPF

EVC1 Electric Vehicle Charging Points – Condition

Before first occupation, a scheme outlining the specific facilities for charging electric vehicles and other ultra-low emission vehicles for each parking space at the premises must be submitted to and approved in writing by the Local Planning Authority. This scheme must meet the minimum requirements in the current West Yorkshire Low Emission Strategy (WYLES) document. The approved facilities for charging electric vehicles must be installed before occupation and retained for use thereafter.

Reason: In the interest of supporting and encouraging low emission vehicles, in the interest of air quality enhancement, to comply with the aims and objectives of Policies LP20, LP24 and LP47 of the Kirklees Local Plan, Chapters 2, 9 and 15 of the National Planning Policy Framework and the West Yorkshire Low Emission Strategy (WYLES).

EVF1 Electric Vehicle Charging Points – Footnote

- The electrical supply of the final installation should allow the charging equipment to operate at full rated capacity and the installation must comply with all applicable electrical requirements in force at the time of installation.
- The conditions relate to Planning Control only. Approval under the Building Regulations may also be required, and the applicant should contact their Building Control Provider for further information in relation to Approved Document S.
