The construction of a poultry shed will cause an offensive smell to my home along with my neighbours as already frequently occurs with the continual burning of plastics and other materials in the field adjacent our properties. We are north-east of the site and will be impacted directly by the prevailing winds. Poultry are not quiet birds and having 1,500 hens will cause noise disruption that currently we do not have to put up with, this will have a negative impact on all adjacent properties due to the proximity. Flooding already causes overland runoff every time it rains as the field adjacent out property has been filled in adjacent the garages in recent years. This now floods my garage directly and causes the farm manure pile & other items (e.g. the corrugated asbestos sheets piled up adjacent the top garage) to be absorbed in to the ground which then run down our driveway to the drains and then to Bolster Moor Road. The construction of a new shed will increase the speed of runoff and worsen the situation further. The water course & drains which are in close proximity to this proposal will be further contaminated by the prospective application.
