<p>I object to the above planning application on these grounds.</p> <p>Health: The well-documented health risks from airborne particulate matter produced by poultry farms to residents living in such close proximity to the proposed site.</p> <p>Noise: The noise from 1,500 chickens and the associated machinery needed to maintain them.</p> <p>Odour: The smell that would be produced would be highly offensive for those living near the proposed farm. Ammonia has a strong odour which will impact on the local air quality. In addition, such a high concentration of animals will certainly attract flies and other vermin.</p> <p>Water pollution: Wastewater and effluent storage and disposal could contaminate the water course which runs through the proposed site.</p>
