<p>I would like to object to this planning application to put a poultry shed at Bolster Moor Farm in the location outlined.</p> <p>There are several inaccuracies in the application.</p> <p>The proposed site of the of the poultry shed in the Site Block Layout plan, doesn't show that there are five houses located closer to the planned site of the poultry shed, it only shows 10 Bolster Grove, which is further away and has other buildings blocking the view to the shed.</p> <p>It also states that the site is not vacant, at the moment there is nothing whatsoever located there.</p> <p>The plan says it is not near a watercourse, this is not right there is one located very close within 10 metres, there is a wildlife pond also located about the same distance away, which could become contaminated with any runoff from the waste.</p> <p>It states that the shed won't be visible from the road, it will be seen from Drummer Lane, Bolster Moor Road and Meeting House Lane</p> <p>It says this venture is not commercial, how can a poultry shed containing 1500 hens not be commercial, will the eggs be free or will they all be eaten by the owner.</p> <p>Location of the poultry shed.</p> <p>Has the location been chosen to have the most impact on his close neighbours there are four or five houses located closer than No10 Bolster Grove, over 25 properties that are living downwind all will all be affected by the stench produced by so many birds carried along by the prevailing winds, along with all the dust and debris produced. We along with several of our neighbours enjoy being outside, especially in good weather, it will stop us for being able to spend time outdoors, because of the noise, smell and dust particles being blown around.</p> <p>The noise will be constant. I like to have the windows open, there will be no opening</p>	

The noise will be nonstop I like to have the windows open, there will be no escaping the noise and smell even inside our home.

Waste

Where will all the waste go from these hens? I can see a muck midden on the plans, if this is where the waste from 1500 hens will be placed, it is in direct line of sight from our kitchen and bedroom, 10 metres from our front door and that of my neighbours. There is already a problem with contaminated water leaking through into our neighbours garage, this filthy water then runs past most of the doors to houses in the lane.

Both of these reasons the manure disposal and the contaminated water runoff pose serious threats to health, we have children and elderly people living close by how can they not be affected by this practice, to say nothing about any mental health issues that will be caused by the stress created for living in such close proximity to the poultry shed.

Storage

There is no mention of where the feed and machinery will be stored, will more sheds and out buildings be required causing more green belt land to be lost.
