<p>My main concern with this proposed poultry shed is how close it would be to houses, the nearest property being less than 20 meters away. There would be 26 houses all within 130 meters of the shed and all downwind. The residents will be subjected to noise, odours and dust from the processing of 1500 egg producing hens and the associated health risks from this airborne pollution.</p> <p>The proposed siting of the shed is close to (within 10 meters) an existing land drain that runs the length of Bolster Moor. The waste excrement, feed, etc from the site will run directly in to the drain. This land drain has been prone to flooding in the past sending water streams close to houses and running in to the local drainage systems.</p>
