<p>The smell will be horrendous and the prevailing wind direction will mean that the smell and dust from the coop will blow directly onto resident's gardens.</p> <p>The chicken feed and excrement will attract rats, which is incredibly unsanitary and completely unacceptable.</p> <p>The noise will be constant and very loud, especially since they plan to use timber for the walls - it will not help with the noise at all. We already have to deal with cows, sheep, and the farm's dogs. This will make it unbearable.</p> <p>The hen muck will contaminate nearby land and water resources.</p> <p>They have stated that it will not be visible from the street, but it is very visible.</p> <p>They also state that it would not be close to a water source, but it will be within 20m of one, hence the contamination point.</p> <p>The site is also currently vacant, another contradiction to their application.</p> <p>Finally, not only will it make life incredibly uncomfortable and unpleasant for all residents, it will also become unsafe. Several residents, including us, suffer from asthma and other lung problems, which means that living next to such a large coop will be near impossible due to the dust and flies and general air contamination.</p> <p>Additionally, there is a nursery and school in the immediate area, and it would pose a serious health and safety issue to the children that go there.</p> <p>In conclusion, it is unacceptable that this coop happen. It is unsafe, unpleasant, disgusting, and must not happen. If you allow this to materialise, you will have ruined not only a lovely environment with a healthy wildlife and ecosystem, but also the living conditions for many residents.</p> <p>We implore you to reject this application for the greater good of the residents, the local community, and the local wildlife and environment.</p>
