<p>I firmly believe that this latest application should be rejected.</p> <p>The original application which was approved in September 2021 was for the demolition of two detached houses to be replaced by two much larger properties. However, since then there have been 6 more applications for further building on the site including another dwelling and various outbuildings, so I find it hard to understand why any more 'storage' is needed, when there are already two very large detached houses, which include 3 entertainment suites, 2 gyms and a well being area, plus a 2 bedroom house for the parents and garages with storerooms.</p> <p>I would also like to add, I know that any equipment needed has to be 'on site' and not stored elsewhere.</p> <p>This development is at the end of a private single track lane, with access to 4 more properties and our lives have been totally disrupted for almost three years - including lane blockages (we have had to walk to the end of the lane to pick up a taxi from the main road to attend urgent medical appointments on more than one occasion when we have been unable to get our car out) a gas leak, and diggers encroaching on our property.</p> <p>So I feel that someone should look at the whole picture from 2021 rather than just the latest application.</p> <p>It must stop now and as such this application for yet more building on this site must and should be rejected.</p> <p>Thank you for reading my concerns</p>
