The same applicant has only just completed a similar extension at 24 Dryclough Ave. after 3 years of workmen, work vans, large wagon deliveries, workmen's radios & shouting and all the sundries that go with a building project. Dryclough Avenue is a single carriage road so all traffic should be parked off road. This did not happen, the contractors parked on pavements causing the residents a variety of problems, often access into their own homes. If this was to be repeated at No 1 which is situated on the narrow bend, it will be a nightmare & dangerous for us to access our own bungalows. We already have problems with school traffic twice daily, football traffic once or twice a week and various other users of the recreation ground. This new extension application is very similar to No. 24 which was an HMO ,is No. 1 to be used for the same purpose? This will entail parking for 4 cars. This site is smaller & doesn't seem to have any room at the back to extend as the application states or for off road parking. The residents of this avenue are predominantly, retired, elderly or disabled who need family & carers to have regular access. wheelchair user and because of traffic being parked on the pavements, to go into the middle of the road. Moving traffic passing these parked vehicles cannot see a wheelchair coming towards them until the last minute. If the building extension was to go ahead on this corner plot I am frightened that it will be an accident waiting to happen. It will basically confine to the house Also the disruption it will cause to the lives of other residents on the Avenue for another 3 years will be overwhelming. Would you please look again at the site & the size of the proposed extension going onto it and if there is multiple parking areas in place. Looking at the property there isn't room at the back of the property to extend at all . It seems to me that this isn't about improving a family home.
