I have seen 1st hand the ongoing disruptions at No.24 currently owned by the same person as on the application for No. 1. The building plans submitted for No.24 weren't the plans the builder was using to change the property as i personally spoke to him about the changes being made. No 24 has again had further changes made in the last 12 months and bears no resemblance to what the council approved so what is to say the changes requested to No.1 will not go the same way. It seems that putting in plans to be approved is a fake approval practice if Kirklees do not inspect and approve building work marching what they have previously given permission for. If the changes to No 1. go the same way there will be 4 years of disruption to a quiet street, building materials dumped on pavements used by parents taking children to nearby schools and the finished property is likely to bear no resemblance to the submitted plans. This should not be allowed to happen before the ongoing queries on No. 24 are addressed.
