The garage is already erected and this has been ongoing for around 3 years The garage is an absolute eyesore - the shoddiness of the brickwork is appalling and a planning officer must visit the site to ensure this is a safe building The bricks are not inline / the grouting does not appear sufficient and the roof unsafe The back of my house is adjacent to their house and this has affected my outlook significantly, more so because of the poor building work Part of my back fence has been removed as it appears they have also erected a concrete building , which again affects the character of the area As there are double French doors at the back of the garage , this causes me concern that it is intended to be living space This is a health and safety issue given the poor quality of the building work and needs inspection
