A new fencing structure around the school would be most beneficial. As a parent of children at this school one of the entrances at drop off/pick up time is no longer accessible due to the gate having rusted shut. Replacement fencing and gates would not only give the site further security for the children who attend there but also gives the site better security on a nighttime. Given the arson attack that took place on the old lydgate school site last year (right next to the infant school) better fencing and gates will deter those who wish to cause trouble. There is no impact on any environmental issues from what I can see on the plans. I hope this application is approved for future children wishing to attend this infant school.
