

## **Appendix A – Climate Change Statement**

### **Climate Change Statement for Planning Applications**

#### **Part 1: Applicant details**

Name of applicant/agent	Mr and Mrs Brooke
Site Address	8C Jackroyd Lane, Mirfield, WF14 8HX
Description of Development	Alterations and Extensions to Dwelling

#### **Part 2: Climate Change Mitigation measures**

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:
Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)
Any energy required will be from renewable energy sources
Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)
Contractors and materials will be sourced locally, wherever possible. Materials ordered as and when required to reduce waste.
Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)
Materials to be used within the new build are wholly recyclable.
Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the

Building Regulations ? (See section 5)
N/A
Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)
Flood risk does not apply to this application.
Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)
N/A.
Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)
None –
Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)
The use of locally sourced materials will be encouraged. Furthermore, local builder/contractor and site personnel will be used where possible to minimise the overall air pollution from the proposed development.
