Removal and rebuilding of boundary walls (within a Conservation Area)

Date Responded: 11/07/2024

Responding Officer: Jack Dunn

Responding Ref: CA26

The submitted arboricultural impact assessment WC-294.1a is a fair and detailed assessment of the site and the proposals impacts. I am confident that the removal of T002, T003 and T005 will be sufficiently mitigated by the replanting of 6 trees on site, post construction.

There are no objections providing the following condition is met. The project arboriculturalist supervises all works undertaken within the RPA's of T001 and T005 and an order of works is submitted detailing the arboriculturalists involvement in the deconstruction/pruning of any roots.
