Good afternoon Jack,

The following works are proposed at Victoria Park, Holmfirth off Cooper Lane and within CA23:

- a. Tree 472220 (T11 on plan) adjacent 3 Cooper Lane Fraxinus excelsior with Cat 3 ADB. It is intended to undertake a heavy crown reduction to see if it comes back as an experimental alternative to removal.
- b. Tree 175632 (T10) on plan adjacent retaining wall to side of garden at 7 Cooper Lane, Salix claimed to be damaging retaining wall. Whilst in a prominent position it is in a condition unlikely to warrant TPO due to the embedded tree guard creating a point of weakness and heavy lean over PROW HOL/104/30. Structures are enquiring about removal to mitigate liability regarding retaining wall damage some 9m from the base of the stem.

Please let me know if you have concerns about any of this work.

Many thanks,

Allan

J A Gardner
