20 August 2024

Dear Edward

Re: 2024/62/91804/E

Erection of stables and formation of exercise arena; land at Northfield Lane, Highburton, Huddersfield, HD8 0QT

Thank you for your consultation letter of 12 August 2024 seeking the views of the Coal Authority on the above planning application.

The Coal Authority is a non-departmental public body sponsored by the Department for Energy Security and Net Zero. As a statutory consultee, the Coal Authority has a duty to respond to planning applications and development plans in order to protect the public and the environment in mining areas.

The Coal Authority Response: Material Consideration

I have reviewed the proposals and confirm that part of the application site falls within the defined Development High Risk Area.

The Coal Authority records indicate that within that part of the application site and surrounding area there are coal mining features and hazards, which should be considered as part of development proposals.

The Coal Authority Recommendation to the LPA

As you will be aware, the Coal Authority's general approach in cases where development is proposed within the Development High Risk Area is to recommend that the applicant obtains coal mining information for the application site and submits a Coal Mining Risk Assessment to support the planning application.

However, when considering this particular proposal, the specific part of the site where the built development is proposed actually falls outside the defined Development High Risk Area. Therefore we do not consider that a Coal Mining Risk Assessment is necessary for this proposal and **do not object** to this planning application.

However, in the interests of public safety the Coal Authority would recommend that the following wording is included as an Informative Note within the Decision Notice:

The proposed development lies within a coal mining area which may contain unrecorded coal mining related hazards. If any coal mining feature is encountered during development, this should be reported immediately to The Coal Authority on 0345 762 6848.

Further information is also available on The Coal Authority website at www.coal.gov.uk

Property specific summary information on past, current and future coal mining activity can be obtained from The Coal Authority's Property Search Service at www.groundstability.com

Please do not hesitate to contact me if you would like to discuss this matter further.

Yours sincerely

Chris MacArthur
