<p>The field is an invaluable resource for many people who choose to responsibly allow their dogs off lead exercise, training and play time. The blocks of allocated time are broken up in such a way that there is rarely (if ever in my experience) more than one vehicle accessing the site at one time - negating any potential increased traffic concerns. I would reiterate that the field is an important facility for many local people and should it not be available in the future it would be a great shame as the site is well run, is kept scrupulously clean and is a privilege to use.</p>
