This is a very important facility for local dog owners, which has no to minimal impact on residents or surrounding areas. We use this facility at least once a week to exercise our dog in a safe and secure environment. Our dog is not in any way a breed that is a danger to the community - she is a very excitable Cockapoo! - she does not recall easily, so we prefer to not let her off lead in public spaces so she is not a nuisance to people or other dogs, or a danger to herself. We very much appreciate this space where she can run around and chase balls and generally live her best life, in safety and happiness. The owners of the dog park have been careful to arrange enough time between visits that there is no overlap and therefore no traffic issues. I would encourage the planning department to recognise this is an important community facility for Kirklees residents and allow it to continue.
