

Architectural elevation drawing of the second floor of a house. The drawing shows a two-story structure with a dark grey gabled roof. The second floor features a central entrance with a small porch, flanked by windows. To the right is a large garage door. The roof has four dormer windows. A chimney is visible on the left side. The drawing is labeled "SECOND FLOOR" in orange text. Dimensions for the garage door are indicated: 1835mm height and 2775mm width.

The image displays a detailed architectural site plan and elevation of a residential property. The site plan, which is the primary focus, shows a large, irregularly shaped lot. A large, light green area at the top represents a lawn or garden, bordered by a dense line of trees. A red line indicates a boundary or a specific feature, with the text "T-RETAINED" written in red near a cluster of trees. The main building footprint is shown in a light tan color, with a dark grey roof. The building has a complex roofline with multiple gables and a central section with a flat roof. Several windows are depicted, including a large multi-paned window in the central section and smaller windows on the side wings. A small square feature, possibly a chimney or vent, is located on the left side of the building. To the right of the building is a parking area with five cars parked in a row. The lot is bordered by a red line, and a dimension of "4900mm" is indicated at the bottom right corner. To the left of the site plan is a detailed elevation of a two-story building. The building has a dark grey roof with a small square window. The facade is light tan with three large windows on the upper floor and a large garage door on the ground floor. The garage door is dark grey with horizontal lines. A dimension of "2700mm" is indicated for the height of the garage door, and "1825mm" is indicated for the height of the side wall. The elevation shows a brick wall and a fence in the foreground.
