<p>Could you please consider the effect of the proposed development at 16, Blakehall Road, Mirfield will have on our life and property.</p> <p style="padding-left: 40px;">we could find these changes will affect our lives.</p> <p>The height of the new wall facing the west side of our property and the subsequent height of the gable raises concerns.</p> <p>The sunshine will likely be excluded to our west facing patio where we spend most of our time, weather permitting. This sheltered area also allows privacy which is not available in any other part of our garden. The sunshine also helps to illuminate as well as heat our lounge through French windows.</p> <p>The loss of light to our small third bedroom is of concern to me. It is here that I deal with household correspondence etc. the loss of some light will certainly have a detrimental effect on me as I struggle to read in the light already available.</p> <p>My final point is that my husband and I had hoped to install solar panels on our West facing elevation roof this summer in an attempt to reduce our fuel charges. With the increased height of the new gable roof this will not be possible.</p>
