Ref the above planning application.

My address is 9a, Headlands

My only real concern is that we do have a significant boundary with the site comprising Garage wall, high wall structure, lower wall structure and main residence.

There will be site clearance of this area and therefore concerns over possible disturbance to these structures which is a risk.

It is a welcome development reducing density of housing and tidying up a pretty overgrown field where annual growth of brambles threaten my property and whole field is an eyesore.

Indeed would welcome a brief chat if possible

Thanks
