<p>Firstly I would like to object to the sub station on the planning you are removing all the trees that are directly opposite where I live and putting the substation there this can have a significant impact on the property value and also can create visual and noise pollution along with health issues. Having looked at the plans this can be relocated onto the site where the houses are been built, why should I have this directly in my view and effecting my property I also object to the houses you are intending building 23 plots with 72 bedrooms potentially this could mean another 72 cars on a already busy road that houses factories, a primary school , numerous business as any of this been thought about.</p>
