<p>I commented on the 2024 plans for this development and supported the development. In this I highlighted things to look at, including the public foot path on the north side of the development. I note that this has been addressed. I am pleased about this. That said, can I highlight that some sort of barrier to prevent motorbikes travelling on the foot path needs to be considered. There has been a number of incidents with motorbikes using the foot path causing havoc to walkers. This has been reported to the police.</p> <p>The Headlands Works site as to stands is an eye sore for the residents of Headlands Road to look at each day. This housing development, once constructed will greatly enhance Headlands Road making a much more pleasant residential area for the existing residents. The application will help to greatly enhance the road. There is a good balance of housing and green spaces on the plans.</p> <p>The balance of residential houses to noisy industrial sites need to be better balanced. The housing development would help with this.</p> <p>I would like to see this site used for housing development and am supportive of the plans.</p>
